Dive•Alert PLUS

The only TRUE dual function surface/subsurface signaling device.

Why use Dive•Alert PLUS?

What would you do in a diving emergency if you needed to get the attention of someone else? Above **or below** the water's surface!

Traditionally, SCUBA divers have relied on whistles as their only audible surface signaling device. But, if a diver is disabled and can't blow into the whistle, the whistle makes no sound at all. Equally frustrating and dangerous, if a diver needs to attract the attention of someone who is too far away to hear the whistle, the whistle is of no help.

Or, what would you do if you wanted the attention of your dive buddy, *for whatever reason*, and he was simply distracted and not paying attention to you at that very moment? Traditionally, you would be forced to swim up to him or her until you got their attention.

In contrast, **Dive•Alert PLUS** enables divers at the mere touch of a button to generate a loud blast of sound on the surface that can be heard up to a mile away! Or, by switching the **Dive•Alert PLUS** diverter valve for **Subsurface** signaling the diver can now signal for his dive buddy's attention underwater!

Dive•Alert PLUS is a specially designed, small, light weight pneumatic signaling device that uses quick-connect/disconnect hose fittings to become an integrated part of your power inflator. Installation is easy and takes only a moment.

Dive•Alert PLUS does not require any modification of your other equipment, and it does not interfere in any way with the normal operation of your other equipment.

When you need to get someone's attention on the water's surface, you simply select "**AIR**" operation with your diverter valve, press the button and **Dive•Alert PLUS** uses a small amount of air from your SCUBA tank to make a piercingly loud sound.

Or, when you want to get someone's attention under the water's surface, you simply select "**H2O**" operation with your diverter valve, press the button and **Dive•Alert PLUS** uses a small amount of air from your SCUBA tank to make a percussion noise to alert your dive buddy.

DP-1

Compatible with all standard power inflators.

DP-2X

Compatible with Seaquest AirSource, Apeks Octo Plus, Zeagle Octo Plus, Beuchat Venturi, U.S. Divers Air Mic, Oceanic Air XS.

DP-3X

Compatible with ScubaPro A.I.R. 2, TUSA Duo-Air, Atomic Aquatics SS1

Details on using Dive•Alert PLUS

INSTALLATION - **Dive•Alert PLUS** connects between the power inflator and the low-pressure hose by means of its quick-connect/disconnect hose fittings.

OPERATION - Operation is as simple as selecting the desired function with the diverter valve and pressing the activator button. To select surface signaling, move the diverter valve so the pointer lines up with the "AIR" graphic. To select subsurface / underwater signaling, move the diverter valve so the pointer lines up with the "H2O" graphic.

Just make sure that before every dive you check that **Dive•Alert PLUS** is installed correctly and functioning properly. Also be careful not to point **Dive•Alert PLUS** toward yourself or toward anyone who is in close proximity to you when you activate the surface signal or loss of hearing could result. (See Warnings)

MAINTENANCE - After each use, **Dive•Alert PLUS** should be rinsed with fresh water. This is especially important after use in chlorinated swimming pools and in other water having corrosive substances. Additionally, it is highly recommended that you blow the water out of **Dive•Alert PLUS** before storing. This can be done by pressurizing and activating both the surface and subsurface signaling elements. We recommend that you cup your hand over the surface signaling element to muffle the loud noise.

Specifications

Body and Internal ElementsInjection-molded Thermoplastic
Diaphragms.....Stainless Steel
CouplingsChrome-plated Brass

One-Year Limited Warranty

Ideations Design, Inc., warrants **Dive•Alert PLUS** to be free from defects in materials and workmanship for one year from the date of purchase from an authorized **Dive•Alert PLUS** dealer. If any functional defects appear in a **Dive•Alert PLUS** unit within the one-year warranty period, the unit will be either repaired or replaced at the option of Ideations Design, Inc.
